**EZ FLOORKEEPER® SERIES OF AUTOMATIC SCRUBBERS**

20" EZ BRUSH DRIVE

20" EZ TRACTION DRIVE

24" EZ TRACTION DRIVE

---

The EZ Series: Value, performance, and one of the industry's most popular walk-behind scrubbers

Each of the units in the EZ Series of automatic scrubbers is perfect for a wide range of flooring services from tile, linoleum and rubberized surfaces to marble and concrete. Ruggedly constructed of rotationally-molded plastic, these machines are a fundamental component in a hard-floor maintenance program. In a single pass, an EZ Floorkeeper lays solution, scrubs, and recovers dirty water, leaving a clean, dry floor behind. Tornado EZs are in use worldwide in retail store chains, grocery stores, and discount stores. Thanks to their quiet operation, compact size, and front-mounted warning light, they can be used in retail settings while customers are shopping.

EZs are also appropriate for commercial and healthcare applications as well as detail cleaning projects in industrial facilities.

EZ Floorkeepers are available in a 20" brush-assisted model, a 20" traction drive unit, and a 24" traction drive unit. All units feature 200 rpm brush speed, 3-stage vac motor, speed control, 13-gallon solution tank and 13-gallon recovery tank. All models come standard with swing squeegee, pad holder, batteries, and charger.

### **AUTOMATIC SCRUBBING MADE EASY**

Ten convincing arguments...

1

#### **A complete package**

Each EZ Floorkeeper comes standard with swing squeegee, pad holder, batteries, and charger. The 20" models offer a choice of two battery packs (see back page for details).

2

#### **Convenient recovery tank drainage**

A drain hose for emptying the 13-gallon recovery tank is located above the brush deck.

24" EZ TRACTION DRIVE

3

#### **Custom Operator Comfort**

The 20" and 24" traction drive units feature state-of-the-art digital controls optimizing performance.

4

#### **Smart design**

The 13-gallon solution tank is easily filled through a side filler door.

# EZ FLOORKEEPER® SERIES OF AUTOMATIC SCRUBBERS

# 5

## Common sense features

A see-through lid on the recovery tank allows the operator to monitor recovery tank level for optimal machine performance.

# 6

## The EZ Traction Drive: Quiet, powerful, reliable operation

The 20" EZ-TD and the 24" EZ-TD feature a traction drive system for the unit's forward motion. The traction drive is a sealed gear unit, a significant reduction in part number compared to competitive units. The traction drive requires no maintenance, has no lube points, and is extremely quiet.

# 9

## Professional performance

The EZs leave behind a clean, dry floor. Easy-to-use controls make the unit an operator favorite the world over.

# 8

## Versatility

The EZ series comes standard with a pad holder for use with any pad. The EZ may also be fitted with optional scrub brushes.

# 7

## Value

The EZ Series offers some of the industry's most competitive automatic scrubbing packages available today.

# 10

## Service made simple

The battery well is easily accessible for maintenance and service operations by qualified personnel.
